

10 Medical Government Schemes in India

25-Page Academic Reference PDF

Prepared as a concise study/reference document using official Government of India health sources.

Scope: National health schemes and programmes

Contents

1. Ayushman Bharat – PM-JAY
2. PM-Ayushman Bharat Health Infrastructure Mission (PM-ABHIM)
3. Janani Suraksha Yojana (JSY)
4. Janani Shishu Suraksha Karyakram (JSSK)
5. National Tuberculosis Elimination Programme (NTEP)
6. National Mental Health Programme (NMHP)
7. National Programme for Health Care of the Elderly (NPHCE)
8. National Programme for Prevention and Control of Non-Communicable Diseases (NP-NCD)
9. National AIDS Control Programme (NACP)
10. Universal Immunization Programme (UIP)

Note: This document is educational. Eligibility, package details, state implementation and service availability can change; users should verify current rules with the relevant government portal.

1. Ayushman Bharat – PM-JAY

Overview

Pradhan Mantri Jan Arogya Yojana (PM-JAY) is the hospitalization-focused component of Ayushman Bharat. The National Health Authority describes beneficiary coverage of up to ₹5 lakh per family per year at empanelled hospitals. The scheme includes treatment for pre-existing illnesses and specified pre- and post-hospitalisation expenses.

Main features

- Financial protection for eligible families against major hospitalization costs.
- Cashless treatment at empanelled hospitals, subject to scheme rules and package availability.
- Coverage includes treatment of pre-existing conditions.

Who is it for?

Primary users: eligible PM-JAY beneficiary families. Eligibility and package rules are determined under the scheme and state implementation arrangements.

1. Ayushman Bharat – PM-JAY – Details

Key services / implementation points

- Financial protection for eligible families against major hospitalization costs.
- Cashless treatment at empanelled hospitals, subject to scheme rules and package availability.
- Coverage includes treatment of pre-existing conditions.
- Beneficiary services include medicines, diagnostics and other covered hospital services.

Study points

The programme should be understood as part of the public-health system. Actual services can depend on facility level, state/UT implementation, beneficiary category, programme guidelines and available infrastructure.

Official source

<https://nha.gov.in/img/resources/Adhikar-Patra.pdf>

2. PM-Ayushman Bharat Health Infrastructure Mission (PM-ABHIM)

Overview

PM-ABHIM strengthens public-health infrastructure, surveillance and health research capacity. The Ministry of Health and Family Welfare describes it as a centrally sponsored scheme with central-sector components aimed at filling critical gaps in health infrastructure and pandemic preparedness.

Main features

- Support for rural and urban Health and Wellness Centres/Ayushman Arogya Mandirs.
- Block Public Health Units for stronger local public-health response.
- Integrated Public Health Laboratories and surveillance capacity.

Who is it for?

The scheme primarily strengthens public systems and infrastructure rather than operating as an individual cash-benefit scheme.

2. PM-Ayushman Bharat Health Infrastructure Mission (PM-ABHIM) – Details

Key services / implementation points

- Support for rural and urban Health and Wellness Centres/Ayushman Arogya Mandirs.
- Block Public Health Units for stronger local public-health response.
- Integrated Public Health Laboratories and surveillance capacity.
- Focus on preparedness for outbreaks and other public-health emergencies.

Study points

The programme should be understood as part of the public-health system. Actual services can depend on facility level, state/UT implementation, beneficiary category, programme guidelines and available infrastructure.

3. Janani Suraksha Yojana (JSY)

Overview

Janani Suraksha Yojana is a safe-motherhood intervention under the National Health Mission. Its stated objective is to reduce maternal and neonatal mortality by promoting institutional delivery among poor pregnant women.

Main features

- Cash assistance linked with institutional delivery and post-delivery care.
- Special focus on states with historically lower institutional-delivery performance.
- ASHA and other frontline workers act as links between eligible women and health services.

Who is it for?

Eligible pregnant women, with implementation and eligibility rules varying by state/category under the scheme guidelines.

3. Janani Suraksha Yojana (JSY) – Details

Key services / implementation points

- Cash assistance linked with institutional delivery and post-delivery care.
- Special focus on states with historically lower institutional-delivery performance.
- ASHA and other frontline workers act as links between eligible women and health services.
- Supports the broader goal of safer pregnancy and childbirth.

Study points

The programme should be understood as part of the public-health system. Actual services can depend on facility level, state/UT implementation, beneficiary category, programme guidelines and available infrastructure.

4. Janani Shishu Suraksha Karyakram (JSSK)

Overview

JSSK was launched on 1 June 2011 to provide free and cashless services to pregnant women accessing government health facilities for delivery and to sick newborns/infants covered by the programme.

Main features

- Free and cashless delivery and free C-section in government facilities.
- Free drugs, consumables, diagnostics and diet during institutional stay.
- Free blood where required and exemption from user charges.

Who is it for?

Pregnant women using government institutional services and sick newborns/infants covered under JSSK.

4. Janani Shishu Suraksha Karyakram (JSSK) – Details

Key services / implementation points

- Free and cashless delivery and free C-section in government facilities.
- Free drugs, consumables, diagnostics and diet during institutional stay.
- Free blood where required and exemption from user charges.
- Free transport from home to facility, referral transport and eligible drop-back services.
- Free treatment and related services for sick newborns and covered infants.

Study points

The programme should be understood as part of the public-health system. Actual services can depend on facility level, state/UT implementation, beneficiary category, programme guidelines and available infrastructure.

5. National Tuberculosis Elimination Programme (NTEP)

Overview

NTEP is India's national programme for tuberculosis control and elimination. The Central Tuberculosis Division provides programme guidance, training resources, TB helpline information and materials including the Pradhan Mantri TB Mukh Bharat Abhiyaan.

Main features

- TB diagnosis, treatment and programme-based follow-up through the public health system.
- Drug-resistant TB guidance and technical operational resources.
- Nikshay-linked programme services and patient support mechanisms.

Who is it for?

People with presumptive or diagnosed TB and communities involved in TB prevention, detection, treatment and support.

5. National Tuberculosis Elimination Programme (NTEP) – Details

Key services / implementation points

- TB diagnosis, treatment and programme-based follow-up through the public health system.
- Drug-resistant TB guidance and technical operational resources.
- Nikshay-linked programme services and patient support mechanisms.
- Community participation is encouraged through initiatives such as Nikshay Mitra.

Study points

The programme should be understood as part of the public-health system. Actual services can depend on facility level, state/UT implementation, beneficiary category, programme guidelines and available infrastructure.

6. National Mental Health Programme (NMHP)

Overview

NMHP was launched in 1982 to improve availability and accessibility of mental healthcare, especially for vulnerable and underserved populations. The programme includes District Mental Health Programme components and the National Tele Mental Health Programme (Tele-MANAS).

Main features

- Early detection and treatment through district mental-health services.
- Training and capacity building for healthcare personnel.
- Community awareness, counselling and referral support.

Who is it for?

People needing mental-health information, counselling, assessment, treatment or referral, with services organized through public-health facilities.

6. National Mental Health Programme (NMHP) – Details

Key services / implementation points

- Early detection and treatment through district mental-health services.
- Training and capacity building for healthcare personnel.
- Community awareness, counselling and referral support.
- Tele-MANAS provides 24x7 tele-mental-health access through 14416 / 1800-89-14416.
- Linkages between primary care, district services and specialist care.

Study points

The programme should be understood as part of the public-health system. Actual services can depend on facility level, state/UT implementation, beneficiary category, programme guidelines and available infrastructure.

7. National Programme for Health Care of the Elderly (NPHCE)

Overview

NPHCE provides accessible, affordable and dedicated health services for older persons. The programme combines preventive, promotive, curative and rehabilitative care through different levels of government health facilities.

Main features

- Health promotion and preventive services for older people.
- Diagnosis and management of geriatric medical problems.
- Outpatient, inpatient, day-care and rehabilitation services as available.

Who is it for?

Older adults using government health facilities; exact service availability depends on facility level and programme implementation.

7. National Programme for Health Care of the Elderly (NPHCE) – Details

Key services / implementation points

- Health promotion and preventive services for older people.
- Diagnosis and management of geriatric medical problems.
- Outpatient, inpatient, day-care and rehabilitation services as available.
- Home-based care and referral linkages for appropriate cases.
- Regional Geriatric Centres support tertiary-level geriatric care.

Study points

The programme should be understood as part of the public-health system. Actual services can depend on facility level, state/UT implementation, beneficiary category, programme guidelines and available infrastructure.

Official source

8. National Programme for Prevention and Control of Non-Communicable Diseases (NP-NCD)

Overview

NP-NCD addresses major non-communicable diseases through health promotion, population-based screening, early diagnosis, management and referral. The Ministry describes focus on conditions including diabetes, hypertension and common cancers.

Main features

- Population-based screening, especially for adults aged 30 years and above under programme guidance.
- Screening and management for diabetes and hypertension.
- Screening for common cancers such as oral, breast and cervical cancer.

Who is it for?

Adults and communities reached through government health facilities and population-based screening activities.

8. National Programme for Prevention and Control of Non-Communicable Diseases (NP-NCD) – Details

Key services / implementation points

- Population-based screening, especially for adults aged 30 years and above under programme guidance.
- Screening and management for diabetes and hypertension.
- Screening for common cancers such as oral, breast and cervical cancer.
- NCD clinics and referral systems at district/CHC levels.
- Health promotion and risk-factor reduction.

Study points

The programme should be understood as part of the public-health system. Actual services can depend on facility level, state/UT implementation, beneficiary category, programme guidelines and available infrastructure.

Official source

<https://www.mohfw.gov.in/sites/default/files/NP-NCD%20Operational%20Guidelines.pdf>

9. National AIDS Control Programme (NACP)

Overview

NACP is India's national programme for prevention and control of HIV/AIDS. Government health programme resources include HIV counselling and testing, prevention of parent-to-child transmission and antiretroviral treatment guidance.

Main features

- HIV prevention and awareness activities.
- HIV counselling and testing services.
- Prevention of parent-to-child transmission.

Who is it for?

People at risk of HIV, people living with HIV, pregnant women requiring prevention-of-transmission services, and key populations reached by programme interventions.

9. National AIDS Control Programme (NACP) – Details

Key services / implementation points

- HIV prevention and awareness activities.
- HIV counselling and testing services.
- Prevention of parent-to-child transmission.
- Antiretroviral treatment and HIV care under programme guidance.
- Services addressing prevention, diagnosis, treatment and support.

Study points

The programme should be understood as part of the public-health system. Actual services can depend on facility level, state/UT implementation, beneficiary category, programme guidelines and available infrastructure.

Official source

10. Universal Immunization Programme (UIP)

Overview

The Universal Immunization Programme is a major national public-health programme providing routine immunization through India's public-health system. Ministry health information systems list UIP among national health programmes.

Main features

- Routine vaccination for children and pregnant women according to the national immunization schedule.
- Prevention of vaccine-preventable diseases.
- Delivery through government immunization sessions and health facilities.

Who is it for?

Children and pregnant women covered by the national immunization schedule; vaccine schedules and delivery arrangements are determined by government guidance.

10. Universal Immunization Programme (UIP) – Details

Key services / implementation points

- Routine vaccination for children and pregnant women according to the national immunization schedule.
- Prevention of vaccine-preventable diseases.
- Delivery through government immunization sessions and health facilities.
- Programme monitoring and surveillance support through the public-health system.

Study points

The programme should be understood as part of the public-health system. Actual services can depend on facility level, state/UT implementation, beneficiary category, programme guidelines and available infrastructure.

Comparison of the 10 Schemes

Scheme	Main health area	Primary focus
PM-JAY	Hospitalization	Financial protection
PM-ABHIM	Health infrastructure	System preparedness
JSY	Maternal health	Institutional delivery
JSSK	Maternal & newborn	Free public-facility services
NTEP	Tuberculosis	Detection & treatment
NMHP	Mental health	Accessible mental healthcare
NPHCE	Elderly care	Geriatric services
NP-NCD	NCDs	Screening & management
NACP	HIV/AIDS	Prevention, testing & treatment
UIP	Immunization	Disease prevention

The schemes cover different parts of the health system: financial protection, infrastructure, maternal and child care, infectious diseases, mental health, elderly care, non-communicable diseases and immunization.

How Citizens Can Use This Information

1. Identify the health need: hospitalization, pregnancy, child immunization, TB, HIV, mental health, elderly care or NCD screening.
2. Check whether the service is delivered through a government health facility, an empanelled hospital, or a dedicated programme centre.
3. Carry the identification/documents required by the relevant programme and follow the current eligibility rules.
4. Ask the facility's help desk, ASHA/ANM/frontline worker or programme desk about enrolment, referral and available services.
5. Use only official government portals for current eligibility, helplines, hospital lists and scheme guidelines.

Important: A national programme name does not automatically mean that every service is available at every facility. State/UT implementation and facility level matter.
